|----------|------------------------------|
| ✓ Python | ✓ Air Monitoring and Testing |
| ✓ GIS | ✓ R (Programming Language) |
| ✓ C++ | |

PROFESSIONAL OVERVIEW

Victor Chen joined ALL4 in October 2021 after graduating from UCLA with a degree in Environmental Science and a concentration in Environmental Health. As an undergraduate, he worked in partnership with the NRDC and WildEarth Guardians where he looked for violations and impacts of oil drilling in New Mexico and Florida. This partnership developed Victor's GIS and Python coding skills and enhanced his project collaboration skills. He also focused on research with UCLA's Aerosol Laboratory under Dr. Yifang Zhu. There he worked with various air monitoring and testing equipment to determine health effects of electronic cigarettes.
