PROFESSIONAL OVERVIEW

Mr. Bruce A. Armbruster is a Directing Consultant working out of the California Office with over thirty years of environmental consulting experience for a wide variety of manufacturing and industrial facilities. Program and project experience includes various EHS compliance and engineering issues for clients in the aerospace, asphaltic roofing materials, corrugated packaging, dietary supplements, electronics, electroplating, food and flavor, medical products manufacturing, metal parts manufacturing, paint and coating manufacturing, personal care products, printing, surface coating and utilities industries.

Other projects include facility development, real estate acquisition, site selection, site auditing, and technical disciplines including site assessment, CEQA, air quality, hazardous materials, hazardous waste, risk assessment, wastewater, stormwater, fire/building code, and planning/zoning issues.

Mr. Armbruster has been a member or leader on more than 150 site selection/facility development teams and 600 site audit teams in the past thirty-one years. Mr. Armbruster has been the team leader on projects involving the site compliance or expansion of transportation facilities, aerospace, electronics, metal parts manufacturing, printing, electroplating, paint manufacturing, food and flavor, asphaltic roofing materials, and medical product manufacturing facilities, and other end users of paints, solvents, and coatings.

Mr. Armbruster and the firm have had significant involvement with Proposition 65 environmental, occupational, and consumer warning issues since 1988 including lawsuits brought by the attorney general and environmental groups.
