PROFESSIONAL OVERVIEW

Ali is the Chief Strategy Officer at ALL4 overseeing the company's data center, power, and chemical sectors.

Prior to his executive role at ALL4, Ali led a fast-growing data center sector for Ramboll in the Americas overseeing all environmental services to the data center sector, led significant growth of a strategic account for the firm, and built a large air quality consulting team in Arlington, Virginia. He also acted as the global Air Quality subject matter expert for data centers.

His technical expertise is in the field of air quality permitting and compliance. During his 18 years of air quality consulting, he has assisted various clients in the public and private sectors with state and federal construction permitting, or ongoing compliance. As a consultant, he has served various industries including data centers, power generation, pharmaceutical, chemical, lime, cement, and oil & gas.

Ali holds a doctoral degree from Southern Methodist University, where his research was focused on controlling particulate matter from diesel engines. He was an adjunct professor at the Catholic University of America (CUA) and is currently on the board of the Civil and Environmental Engineering Department at CUA.
