### PROFESSIONAL OVERVIEW

Dan Heimbigner has 15 years of experience providing hands-on regulatory support to clients throughout the Pacific Northwest. His areas of expertise include industrial stormwater management and environmental permitting. Dan has assisted more than 20 facilities with National Pollutant Discharge Elimination System (NPDES) permits create and implement successful stormwater management programs.

Dan has prepared permit application packages for projects including NPDES, Shorelines Substantial Development, State Environmental Policy Act (SEPA), Joint Aquatic Resource Permit Application (JARPA), and Hydraulic Project Approval (HPA). Throughout his career, Dan has worked on a variety of projects ranging from Voluntary Cleanup Program remediation to marine sediment assessments. He has prepared sediment sampling and analysis plans for marinas, ship maintenance facilities, and barge loading facilities, overseen sediment sample collection, and acted as a communications liaison between clients and regulatory agencies.
