PROFESSIONAL OVERVIEW

Ms. Meredith Pedraza is a graduate from Humboldt State University (HSU) with a bachelor's degree in environmental science with a concentration in environmental policy. She has over six years of experience in Environmental, Health, and Safety consulting and is currently enrolled in a master's degree program in occupational safety and health at Columbia Southern University (CSU). Meredith specializes in waste management and Resource Conservation and Recovery Act (RCRA) compliance.

Industries: Meredith has served a variety of industries including defense technology; forging; bulk fuel dispensing; metals recycling; battery recycling; paper corrugation; paint manufacturing; flavors and fragrances manufacturing and distribution; and data centers. She has primarily served businesses in California, but has also provided support to businesses in Georgia, Texas, Massachusetts, North Carolina, Colorado, Nevada, Mississippi, and Maryland.

Specialization: Meredith specializes in services related to hazardous waste compliance and is a member of the Coalition for Responsible Waste Incineration (CRWI). She prepares RCRA part B applications, waste analysis plans, closure plans, biennial reports, hazardous waste source reduction reports, standard operating procedures, and EPA ID registrations. She provides hazardous waste training as a part of a comprehensive EHS training curriculum. Meredith also specializes in occupational safety and health. She prepares written programs including personal protective equipment, hazard communication, forklift safety and many more. She conducts OSH gap assessments and provides OSH training.

Meredith's primary services include preparing EHS standard operating procedures, conducting EHS compliance evaluations, conducting EHS training, and general EHS compliance assistance. EHS standard operating procedures include inspection requirements and personnel assignments for compliance with a wide variety of EHS regulations, including health and safety, hazardous

waste, and stormwater. EHS compliance evaluations consist of an in-person inspection of the facility, an in-depth records review, and a final report.

Other Experience: *Meredith works on business emergency plans and Tier II chemical disclosures. Meredith has also been involved with preparing wastewater discharge permit applications and wastewater self-monitoring reports. She has also conducted stormwater inspections and assisted in preparing stormwater pollution prevention plans.*
