### PROFESSIONAL OVERVIEW

John has over ten years of experience in achieving EHS excellence for clients in general industry. He uses EHS matrices to manage the clients' EHS regulatory requirements to ensure compliance and meet best practices. John and the ALL4 team serve clients through development, management, and execution of EHS programs such as lockout/tagout, hazard communication, risk assessment, emergency response, training and environmental permitting. As a project manager, he is recognized for his effective communication, strategic problem-solving, and strong commitment to client service and workplace safety.
