PROFESSIONAL OVERVIEW

Courtney is a Managing Consultant at ALL4 working as project manager for client EHS system implementations.

Prior to her role at ALL4, Courtney served in the United States Marine Corps specializing as a Combat Engineer and Modeling and Research Analyst. Her specialties during that time included national and international logistical planning for transport and sustainment, policy development, and research in support of enterprise acquisitions.

During her time at ALL4 she has developed technical expertise in designing Enablon and Cority digital solutions for clients' EHS practices. Courtney works with clients in operational change management to increase user adoption of systems and ensure positive user experience throughout transitioning to new systems. She also supports clients in data management and transfer from legacy systems into new systems to ensure that data repositories are maintained during transition.
