| ✓ Air program management consulting; | ✓ CAA 129 Solid Waste Combustion regulations; and |
| | ✓ Multimedia Corporate Environmental Training. |

PROFESSIONAL OVERVIEW

Ms. Kristin Gordon has over 16 years of experience in environmental management consulting for industry and government. Ms. Gordon has air permitting experience in over twenty-five states with emphasis on Title V, MACT, and NSPS. She has worked for a variety of industries including Power, Chemical, Petroleum Refining, Pharmaceutical, Pulp & Paper, Battery Manufacturing, Secondary Lead Smelting, Medical Waste Incineration, Waste Combustion, Food and Beverage, Automotive, Steel, and the military.

Ms. Gordon's approach to environmental consulting aligns with All4 Inc.'s mission to specialize in finding innovative approaches to assist clients, with the goal to ultimately provide our clients with competitive advantages in their respective industries.

During her professional experience, Ms. Gordon has demonstrated a capacity to identify and apply management and automation concepts into a wide range of environmental data management and permitting applications with the objective to minimize the impact of environmental requirements on daily operations.

Ms. Gordon has developed and implemented several customized database applications for clients to calculate and manage emissions inventories, to track multimedia federal and state environmental regulatory changes, and to manage other related environmental program issues.

Ms. Gordon has worked with MACT/NESHAP standards for a variety of industries. Ms. Gordon has also worked extensively with the CAA Section 129 Solid Waste Combustion Regulations. She has written several white papers and articles dealing with MACT and NSPS and has presented to various industry groups and associations. Ms. Gordon regularly provides environmental training programs to ALL4 clients.
