### PROFESSIONAL OVERVIEW

Ms. Merritt McGlynn is a Consulting Manager with more than 17 years of experience in the field of environmental air quality consulting. Merritt has managed projects involving air quality consulting and permitting for an array of industries (pharmaceutical, consumer products, natural gas distribution, aerospace, data management, and food/beverage), with expertise in the energy and power sector.

Merritt has extensive experience in of air permitting, including Federal New Source Review (NSR) and Prevention of Significant Deterioration (PSD) major source air permitting, Title V operating permits and renewals, and minor source permitting, which extends to capital projects, permit streamlining, annual reporting programs, reducing compliance burdens, and achieving cost savings. She has worked extensively with clients on various regulatory programs such as New Source Performance Standards (NSPS), National Emission Standards for Hazardous Air Pollutants (NESHAPs), Mandatory Greenhouse Gas (GHG) Reporting Rule, PSD netting analyses, and BACT determinations, and other federal, state, and local air pollution control regulations.

She has specialized in Air Program Compliance Management design, implementation, and maintenance; developing and presenting permit-based employee training; coordinating interdepartmental projects from conception to completion; and serving as an integral member of facility environmental staff on site.

Merritt is an active member of an NJDEP and Industry Air Permits Stakeholders Group, whose objective is to streamline and clarify the air permitting process in NJ.
