TECHNICAL EXPERTISE

- ✓ *Stormwater Pollution Prevention Plan preparation.*
- ✓ *Stormwater Ad Hoc Report preparation.*
- ✓ *Level 1 and 2 Exceedance Response Action Report preparation.*
- ✓ *Level 1 and 2 Exceedance Response Technical Report preparation.*
- ✓ *No Exposure Certification preparation.*
- ✓ *Lucidchart mapping software.*
- ✓ *Wastewater discharge permit application preparation.*
- ✓ *Business Emergency Plan preparation.*
- ✓ *Phase 1 site assessment preparation.*
- ✓ *Stormwater Annual Report Monitoring preparation.*

PROFESSIONAL OVERVIEW

After earning my Bachelor of Arts in Environmental Studies from California State University San Bernardino in 2019, I entered the environmental consulting industry. I joined Jorgensen Environmental in December 2019 as an intern and as an associate in December 2020. I joined ALL4 in February 2020 and I am involved in a variety of different projects involving stormwater, wastewater, site assessments and business emergency management plans.

Experience in preparing reports relating to stormwater management includes preparation of clients application of General Permit for Stormwater Discharges associated with industrial activities, issued by the State Water Resources Control Board. In order to meet requirements of Industrial General Permit preparation of Stormwater Pollution Prevention Plan (SWPPP) has been performed. In the event of exceedance of specific Numeric Action Levels as defined by General Permit, aid in preparation of Level 1 and 2 Exceedance Response Action Report and Technical Report has been performed. Additionally, preparation of clients No Exposure Certification issued by the State Water Resources Control Board has been performed.

Preparation of reports relating to wastewater management include preparation of clients application of Industrial Wastewater Discharge permit issued by associated regional utility agency. Preparation entailing identification of wastewater generating processes and characterization of wastewater. Identification of wastewater generating processes performed by communication with site personnel. Characterization of wastewater determined by calculation of industrial wastewater discharge flow rate, analysis of wastewater analytical report and development of wastewater process flow diagrams.

Preparation of reports relating to Hazardous Materials include preparation of clients Business Emergency Plan (BEP) overseen by California Environmental Protection Agency. Preparation of BEP requiring identification of hazardous material of appropriate reporting quantity and determination of chemical content, hazards and other parameters.
