PROFESSIONAL OVERVIEW

Tom Cunningham is a Project Engineer with experience in multimedia permitting and compliance. Tom has prepared and assisted in the preparation of Natural and Synthetic Minor Operating Permit applications in PA, NJ, DE, MD, and VA. Tom also has experience in the permitting of crushing and screening plants under PA and NJ general permits. Tom has done compliance reporting, such as MD's emissions inventory reports and Tier 2/Community Right-to-Know reporting. Tom has provided technical support in several multimedia projects, including groundwater quality reporting, solid and hazardous waste permitting, and resource recovery/recycling permitting.

Tom joined ALL4 as a member of the Continuous Monitoring System (CMS) practice area team to provide technical support for the development of work products and regulatory review. The CMS team is responsible for tracking and providing guidance for upcoming regulations, providing data analysis, developing educational tools for CMS systems to ensure compliance, and myriad other services associated with CMS.
