PROFESSIONAL OVERVIEW

Mr. Ernan Nava graduated from the University of California, Irvine with a Bachelor of Science in Environmental and Civil Engineering and a minor in Earth and Atmospheric Sciences. Mr. Nava chose his education to gain the skills needed to protect and contribute to a tangible improvement in the natural environment. Mr. Nava's goal led him to his current role as a Project Engineer for ALL4 working out of the California office.

Mr. Nava has approximately four years of experience in environmental health and safety consulting. As a Project Engineer Mr. Nava has worked with various manufacturing facilities on a variety of projects. Mr. Nava has worked on projects in several industries including metal forging, aluminum recycling, automotive and aerospace parts manufacturing, lithographic printing, paint manufacturing, and beauty product manufacturing among others. For these clients and others, the bulk of his work has been in permit application, compliance auditing, emissions test coordination, and local, state, and federal regulatory reporting.

The majority of projects Mr. Nava has worked on are based in California and were completed for the South Coast Air Quality Management District. However, Mr. Nava has also worked with regulatory agencies nationwide including the agencies of Oregon, Texas, Georgia, Florida, and Connecticut.
