| ✓ VBA   |   |

---

### PROFESSIONAL OVERVIEW

Karen has six years of experience bridging gaps between various systems to create meaningful datasets and statistical analyses. She develops applications for migration, automation, reduction of redundant data entry, and data consistency. Ms. Cheung is adept at backend and frontend development; she creates modern, user-friendly interfaces to bring legacy systems to the present.

She has worked directly with clients to streamline processes such as emissions reporting. She has significant experience customizing and maintaining content management systems tailored to compliance in air quality, hazardous waste, inspections, and health and safety.
