PROFESSIONAL OVERVIEW

Ms. Stephanie Taylor is a Chemical Engineer and EHS professional with over 35 years of experience in EHS(Q) programs and compliance and digital solutions. For the past 10 years she has been a Digital Solutions Practice Director, focusing on developing and overseeing a team of EHS and IT professionals who support clients in EHS(Q) requirements gathering, system selection and gap analysis, work process analysis/harmonization/optimization, system design and configuration, system integrations, and the development of reports and dashboards. Ms. Taylor and the team's approach is focused on tools and techniques that lead to successful, sustainable solutions with high degrees of user acceptance and adoption. With her background as an EHS Manager, she has a deep understanding of client EHS challenges and pain points and works collaboratively with clients to select, implement and manage "fit for purpose" digital solutions.

Ms. Taylor has successfully managed a number of multi-year, multi-million dollar programs covering EHS and quality for global and national organizations across multiple verticals including O&G, Chemicals, Manufacturing, High Tech and Life Sciences.
