- ✓ *PL/SQL and SQL Programming*
- ✓ *Leading client requirements gathering workshops*
- ✓ *Training clients MIS applications*
- ✓ *Leading User Acceptance Testing and Issue Resolution*
- ✓ *Providing Ongoing support*
- ✓ *Experience in MS Office applications*
- ✓ *Custom Report Development*
- ✓ *Experience with custom interfaces/ETL*

PROFESSIONAL OVERVIEW

Ms. Garg has more than 20 years of experience in implementing commercial MIS applications. She is experienced in designing, tuning and administrating Oracle and SQL Server databases for commercial applications, creating custom reports to meet client's needs and developing custom interfaces/ETL tools to various historian and other systems. Her responsibilities and expertise include project management and planning, requirements gathering, application configuration, creating reports, and developing/managing backend processes and data loaders. She also provides UAT support to the clients during the testing cycle, conducts training for them, and serves as systems manager for a multiple client in the post go-live (operational) phase. She is a strong team leader and works towards smart and long-lasting solutions.

Ms. Garg has lead implementations of several Enablon modules, such as Regulatory Compliance, Audits, Inspections, Action Plans, Sampling, Waste, Change Management, Incidents Management and Occupational Hygiene for Oil & Gas and Aerospace companies. This included conducting requirements gathering and business analysis workshops, developing gap closure plans, design, configuration, training, UAT support and historical data migration support. She has led multiple Enablon upgrade projects from v7.6 to v8.6, v8.6 to v8.14 and is currently leading an upgrade project from v8.10 to v9.2.
