**PROFESSIONAL OVERVIEW**

*Mr. Paul Mallon is a Managing Consultant with more than 12 years of experience in the field of environmental consulting. Paul has managed projects involving air quality, wastewater, and stormwater permitting and compliance for an array of industries (coating, pigment, hospitality, metal finishing, pharmaceutical, consumer products, aerospace, food/beverage, precious metals, and gasoline distribution).*

*Paul has extensive experience in minor source air permitting, including operating permit applications and renewals, permit streamlining, annual reporting programs, reducing compliance burdens, and achieving cost savings. He has worked extensively with clients on various regulatory programs such as New Source Performance Standards (NSPS), National Emission Standards for Hazardous Air Pollutants (NESHAPs), and other federal, state, and local air pollution control regulations.*

*Paul also has extensive experience in wastewater permitting and compliance (including permit applications and renewals, permit compliance, IDMR reporting, sampling oversight, and investigating potential causes of permit exceedances), stormwater permitting and compliance (including permit applications, permit compliance, DMR reporting, stormwater sampling oversight, and determination of discharge locations), annual environmental reporting (including emission statements, TRI, Tier II, and Residual Waste), TSCA approvals and reporting, and PPC Plan development.*
