**PROFESSIONAL OVERVIEW**

*With extensive experience in Environmental, Health, Safety, and Sustainability (EHS&S) software solutions, Mr. Myers has successfully guided Fortune 500 companies through software selection, implementation, and business process enhancement. His expertise lies in designing and executing sustainable technology solutions that align with organizational goals, ensuring regulatory compliance, and driving digital transformation. As a trusted advisor, he develops strong client relationships and provides strategic insights to enhance business processes within Environmental, Health, and Safety organizations, fostering long-term sustainability initiatives.*

*As a Certified Project Manager, Mr. Myers has led multi-year enterprise software implementations, overseeing complex digital transformation projects with a focus on efficiency and value delivery. His ability to develop and execute strategic roadmaps for EHS&S programs has positioned him as a key consultant for executives at the VP and Director levels. With deep technical knowledge of various web development and cloud technologies, he served as a system architect for EHS&S SaaS platforms, handling system administration, reporting, API integrations, and application configurations while leveraging different Software Development Life Cycle (SDLC) methodologies.*

*Beyond technical expertise, his leadership extends to program and project management, change management, and business strategy development. Mr. Myers excels in problem-solving, cross-functional team leadership, and business process improvement, ensuring seamless IT integration and enterprise-wide digital transformations. His ability to align technology with business objectives has made him an asset in IT-enabled business transformation, helping organizations navigate complex challenges while optimizing operations for long-term success.*
