

The Cat 38 Check-Up

The Pennsylvania Department of Environmental Protection Categorical 38 (Cat 38) Exemption has allowed your operations to avoid the more rigorous plan approval and air permitting requirements under 25 PA Code Chapter 127. HOWEVER, did you realize that there are specific and on-going recordkeeping and compliance demonstration requirements that need to be met in order to continue to qualify for the Cat 38 Exemption? ALL4 is offering a flat fee, Cat 38 Check-up to ensure that your operations are meeting the PADEP requirements.

You should use ALL4's Cat 38 Check-up if you:

- Operate/own an unconventional well site and have relied on the Category 38 exemption from plan approval requirements
- Have storage vessels/storage tanks operating at your site
- Have well drilling, well completion, or other activities occurring at your site
- Utilize a non-road compression ignition engine at your site
- Are unsure if your monitoring/recordkeeping is sufficient to meet Cat 38 requirements and Federal New Source Performance Standards (NSPS) Subpart OOOO regulations

The cost for ALL4's Cat 38 Check-up services is \$3,000 per site, and includes:

- A site visit
- A checklist summary of where your operations stand with respect to the PADEP requirements
- Recommended action items to address potential discrepancies
- A 2014 compliance calendar of air regulations affecting your site operations

At \$3,000 per site the Cat 38 Check-up is an affordable way to ensure environmental compliance. If you have multiple sites to be inspected, ALL4 offers a bulk site discount.

To obtain more information about the ALL4 Cat 38 Check-up contact:
Roy Rakiewicz at 610-933-5246 ext 127
JP Kleinle at 610-933-5246 ext 120

ALL4 is a Pennsylvania-based company specializing in air quality.
